ACTS
Digital Temperature Sensor

ACTS

Electrical Connections

1. Introduction

The Claudgen ACTS digital temperature sensor can be use with claudgen's RACHL range and CA range of commercial air curtains. It can effectively measure the room temperature or the external temperature and react accordingly.
The sensor is low voltage and can be used outdoors. The sensor should be connected to the main PCB Board as shown above. For full instructions on the set-up and wiring please refer to the heater or controllers user instructions.

NOTE—the sensor will only work when used in conjunction with the ACMC touch screen controller.
