Infrared Radiant Heaters

IRH10 & IRH20

The IRH electric infrared radiant heater is designed for indoor and sheltered outdoor applications, providing comfortable long-wave radiant heat for residential and commercial environments such as homes, offices and similar spaces. Long-wave electric heating technology delivers gentle, even warmth without visible light, making the heater suitable for areas where ambient comfort is required.

A slim anodised aluminium body incorporates a high-efficiency reflector to help distribute heat across the occupied area. The heater can be wall or ceiling mounted and offers user-adjustable control via remote operation, if using SLEXT and a controller.

FEATURES:

- 1kW or 2kW rating
- Long-wave electric radiant heating technology
- Zero-light operation
- High-efficiency aluminium reflector
- Slim anodised aluminium construction
- Wall or ceiling mounting with adjustable bracket
- Comes with SLEXT wired
- Remote-controlled operation if SLEXT used
- Compatible with any Consort wireless controllers
- IPX4 rated protection
- Suitable for indoor and sheltered outdoor use
